Claims 11-14 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

See Paper No. 082904, paragraph 2.

Applicant's arguments filed 11-22-04 have been fully considered but they are not persuasive. The applicants argue that their example 3 shows the copolymerization of 300 grams of a trimer having an NCO content of about 16 wt. % with 700 grams of a prepolymer having an NCO content of 6.4 wt. %. The resulting NCO content of about 9 wt. % would result from a simple mixture of the two NCO terminated components, meaning no reaction took place. The copolymerization would take place upon applying the coating in air. The applicants submitted product information of Desmodur E-3265 as proof that such a copolymer would be soluble. According to USP 6,071,564, Desmodur E-3265 would be comparable to the hard segment component of the applicants' invention. It's an isocyanurate product of hexamethylene diisocyanate having an equivalent weight of 400 and a functionality of 10.4.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
